EDUCATION

St. Cloud State University

St. Cloud, MN

BSE in Software Engineering - GPA: 3.68

- Organizations:
 - Computer Science Club & Student Organization for Software Engineers.

EXPERIENCE

IT Intern

Avon, MN

Blattner Energy

Apr. 2025 - Current

- **Developing** and providing systems and software training to the end-users
- Coordinating day-to-day ticketing system and working with IT staff to provide end-user **solutions**
- **Maintaining** end-user documentation, knowledge base, and recurring communications to the end-user community

React Web Developer

St. Cloud, MN

Obsidian Code

May 2023 - Dec. 2023, Sep. 2024 - Current

- Played a key role in enhancing the **front-end** architecture for the platform used to track student attendance, grades, and other administrative data for Minnesota state schools
- **Leveraged** React & Tailwind to build a scalable, reusable frontend, cutting future design **costs** indefinitely and ensuring long-term adaptability
- Modernized the UI/UX, increasing sales leads by **50%** with an industry-standard design that received unanimous staff approval and was tailored to client needs
- Delivered a **scalable**, maintainable solution now successfully deployed across multiple school systems across Minnesota
- Leading migration of a legacy codebase to a modern React framework, improving **maintainability**, **scalability**, and long-term **adaptability**
- Ensuring a smooth transition for an existing school system, reinforcing client trust, improving **retention**, and **expanding** sales opportunities through platform reliability
- Overhauling an outdated database system, addressing schema design, data compatibility, and migration **integrity** to ensure a seamless transition without disrupting operations

PROJECTS

RateMyMovies : Rate and Find Movies - ratemymovies.netlify.app | github.com/jadonburgardt/movierater

- Implemented **dynamic** movie lists where users can add, rate, and track personalized movie entries, including custom additions to the database
- Enabled **seamless** searching and filtering through an extensive movie database, offering users powerful filtering options to refine their lists
- Developed a dynamic movie rating website using HTML, CSS, JavaScript, and MySQL, integrating **user authentication** and data storage for personalized movie tracking

BankIt : A Modern Banking Web App - bankit-app.netlify.app | github.com/jadonburgardt/bankitapp

- Implemented money transfer **functionality**, supporting currency conversion (Euros to USD)
- **Integrated** loan request and account management features
- Utilized HTML, CSS, and JavaScript to build a responsive, **user-friendly** interface
- **Optimized** app performance by using modern loading methods
- *Note for viewing the live demo: The logins are (JS, 1111) and (JD, 2222)*

SKILLS

Languages: JavaScript, TypeScript, HTML, CSS, Python, C++, C#, SQL

Frameworks: React, Flask, Next.js, Node.js

Libraries: Tailwind, SASS

Databases: MongoDB, MySQL

Dev Tools / Concepts: Git, Figma, UML, Agile, Scrum, Version Control
